Kapazitives Touchscreen-Display

- ✓ *Einscheibensicherheitsglas.*
- ✓ *Kapazitives Touchscreen-Bedienfeld mit TFT mit 10,4".*
- ✓ *RGB-Hintergrundbeleuchtung des Bedienfelds.*
- ✓ *RGB-Licht im Abgabebereich.*
- ✓ *Mithilfe eines USB-Sticks können individuell gestaltete Bilder der Getränke, Filmmaterial und Bildschirmschoner eingegeben werden.*
- ✓ *Bidirektionale Wi-Fi-Verbindung serienmäßig.*

New Services Boiler and Coffee Heater

S30 is equipped with two boilers, made from stainless steel with external insulation: the first generates steam and hot water, while the other is dedicated to the preparation of coffee-based beverages.

The new coffee boiler performs better and allows for more consistency in the delivery of Coffee Cream, Americanos etc. The patented Smart Boiler system optimises the performance of hot water and steam avoiding reduced production during rush hours.

Hoppers and Solubles

Double hopper for coffee from 1 to 1.2 kg and an incorporated soluble hot chocolate system. The S30 ensures the optimal delivery of soluble materials.

Motorised Spout (Optional)

The motorised control of the supply spout allows you to set the different positions of the spout for each programmed drink.

Integrated Bidirectional Wi-Fi system

You can communicate with the S30 remotely thanks to the integrated bidirectional Wi-Fi, making it quick and easy to upgrade the software, adjust the recipes and personalise the interface images.

Integriertes bidirektionales WI-FI-System

Mit der S30 ist dank des integrierten bidirektionalen Wi-Fi-Systems auch die Fernkommunikation möglich. Die Softwareaktualisierung, die Einstellung der Rezepte und die individuelle Gestaltung der Bilder auf der Schnittstelle gehen damit einfach und schnell vonstatten.

AWS Automatic Washing System

The daily wash cycles are managed automatically by the AWS. This innovative system cleans deeply and efficiently, ensuring maximum hygiene at the touch of a button.

Automatisches Spülsystem AWS

Die täglichen Spülzyklen werden automatisch durch das AWS-System gesteuert. Dieses innovative System erlaubt eine gründliche und effiziente Reinigung und garantiert maximale Hygiene mit einer einzigen Berührung.
